About me

Full-stack engineer with 2.5 years building incentive infrastructure and internal tooling for the Aave ecosystem. Looking for my next challenge in an ambitious DeFi team.

Skills

Programming

- Backend: TypeScript, Node.js, Bun, Express, REST APIs, viem, ethers.js, SQL, PostgreSQL, Redis
- Frontend: React, Next.js, TailwindCSS
- Contract: Solidity, Foundry
- Tooling: GitHub Actions, Docker

Blockchain & Web3

- Deep knowledge of DeFi ecosystem: Lending, DEXs, Governance, Incentive systems
- EVM internals: storage layout, proxy patterns, ABI encoding
- ZKP fundamentals

Events

- EthCC 4 to 8
 - EthCC Hack 2022: Sismo & Kleros prize winner
- Devcon Bangkok & Devconnect Buenos Aires
 - Mentor at EthGlobal Bangkok
- Sponsor at EthPorto & ZKHack Lisbon

Education

Engineering degree | 2018-2023

One of France's top 15 engineering schools (Centrale Lille IG2I) turning out fully qualified postgraduate engineers in computer science applied to industry

Work Experience

Software engineer & Incentives manager

Aave / ACI | 2024 (2.5 years)

- **Built and owned the full incentive infrastructure for Aave** — in-house computation engine, then led the full migration to Merkl
- Developed masiv-accounting, a modular **accounting, monitoring, renewal and alerting system** for incentive campaigns, and aave-incentives-api, a unified REST API aggregating multiple incentive sources
- Managed incentive budgets and campaigns end-to-end — from business terms with third parties to on-chain execution via Safe multisig, **handling hundreds of millions** in DAO and partner funds
- Built and shipped multiple frontend apps (Delegate, Stream, Incentives) under apps.aavechan.com
- Contributed to **Aave governance** through AIP creation and review, the **Aave V3 interface**, and third-party integrations (DeFiLlama, Etherscan...)

Developer relations engineer Internship

Sismo | 2023 (6 months)

- Development of the [Sismo Hub](https://sismo.dev) project (Node.js)
- Managed Sismo developer community GitHub PRs & Created contribution issues
- Wrote documentations and tutorials for Sismo developer community
- Supporting developers during hackathons

Software Engineer internship

Relief Application | 2021 (9 months)

Fullstack development on [OORT](https://oort.dev), an open source web application for [WHO](https://who.int) (Angular and Node.js)

Projects

zk-whiteboard.xyz | September - October 2023

Developed an entertaining anonymous messaging platform using Sismo technology. Obtained a grant from Sismo to improve project features. [Github link](https://github.com)

[OnlyGoodVibes](https://onlygoodvibes.dev) - October 2023 (2-days project)

Developed a "bad vibes-free" social network built on [LensProtocol](https://lensprotocol.org). The application display the Lens feed and filter posts using ChatGPT. [Github link](https://github.com)
